## Week 6 – Scrum

By [plandoraproject < https://plandora51897980.wordpress.com/author/plandoraproject/>](https://plandora51897980.wordpress.com/author/plandoraproject/)

**8. Nov 2020** < [https://plandora51897980.wordpress.com/2020/11/08/week-6-scrum/>](https://plandora51897980.wordpress.com/2020/11/08/week-6-scrum/)

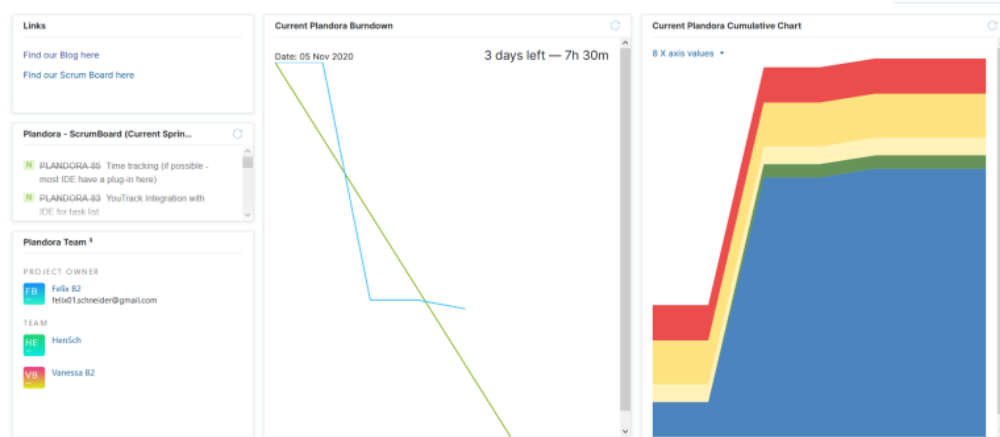

**2 Comments** < <https://plandora51897980.wordpress.com/2020/11/08/week-6-scrum/#comments>>

We used the 6th week to work on our scrumming.

Firstly, we made sure that each task is estimated, assigned to a team member, and tagged with the corresponding WORKFLOW and PHASE. Furthermore, we began to call our sprints *<RUP Phase> #<Week>* and organized our tasks in swim lanes/stories. More detailed information about RUP, Phases and Workflows can be found [here < https://de.wikipedia.org/wiki/Rational\\_Unified\\_Process>](https://de.wikipedia.org/wiki/Rational_Unified_Process).

After that, we created a [YouTrack Dashboard < https://plugins.jetbrains.com/plugin/9286-darkyen-s-time-tracker>](https://plugins.jetbrains.com/plugin/9286-darkyen-s-time-tracker) to display the Burndown of the current sprint, as well as a

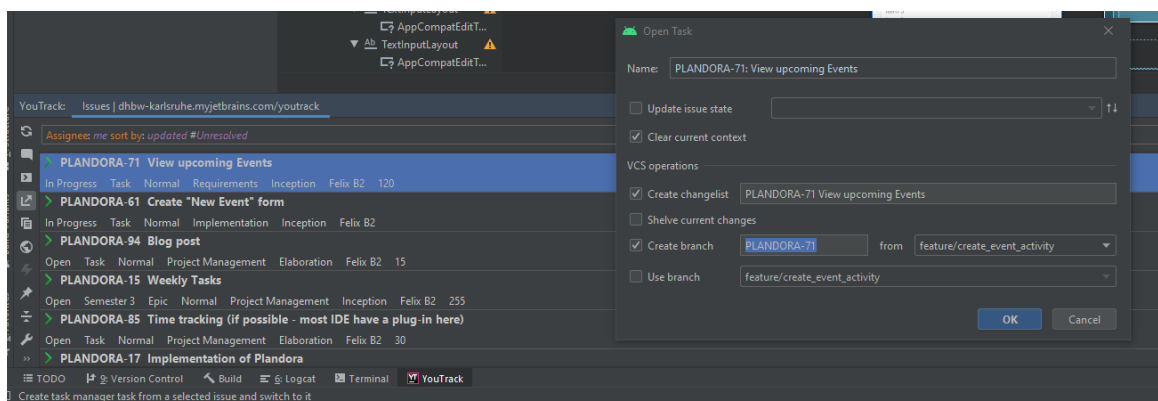

## Cumulative Chart.

YouTrack Dashboard

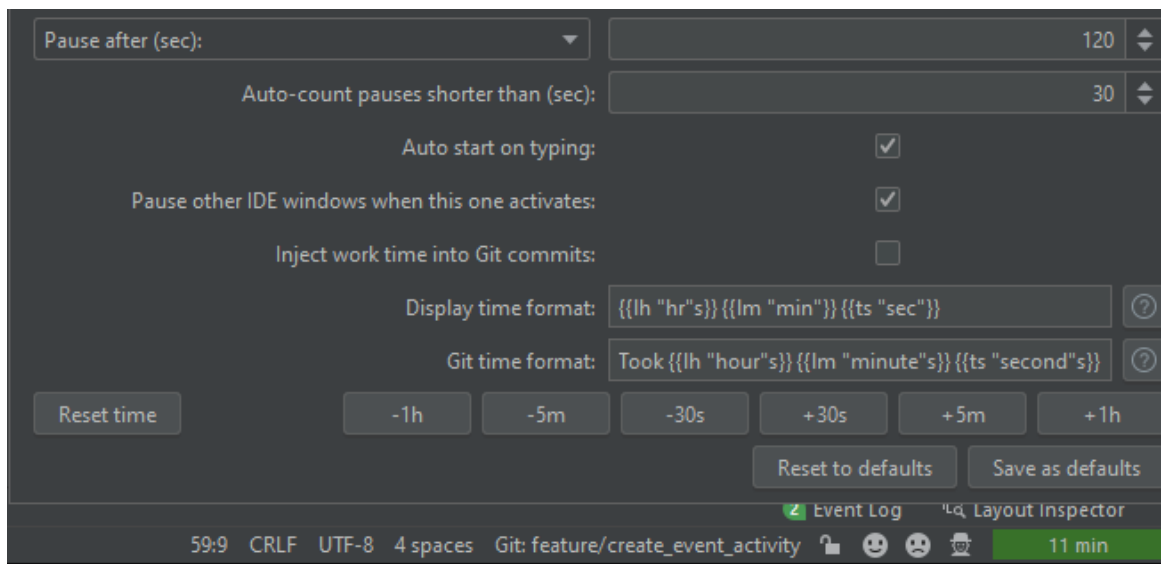

We also added multiple integrations to our IDE ([Android Studio < https://developer.android.com/studio >](https://developer.android.com/studio)):

## YouTrack Integration:

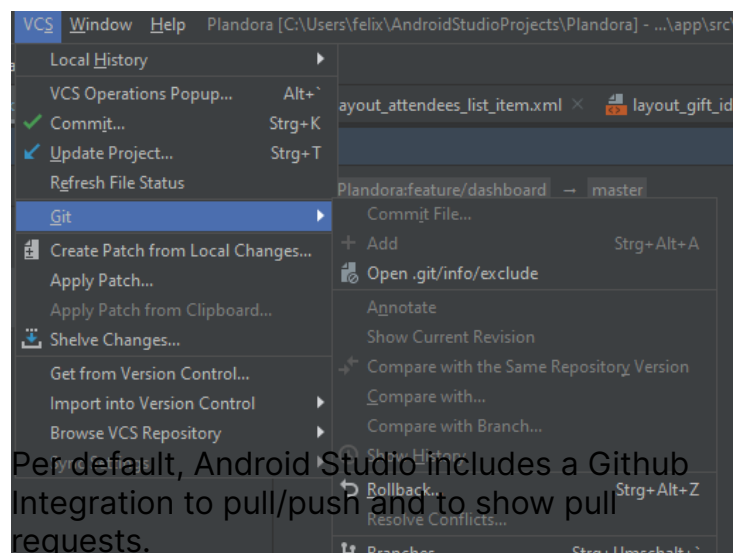

The [YouTrack plug-in < https://plugins.jetbrains.com/plugin/8215-youtrack-integration >](https://plugins.jetbrains.com/plugin/8215-youtrack-integration) is used to show and edit YouTrack tasks

## Time tracking plugin-in

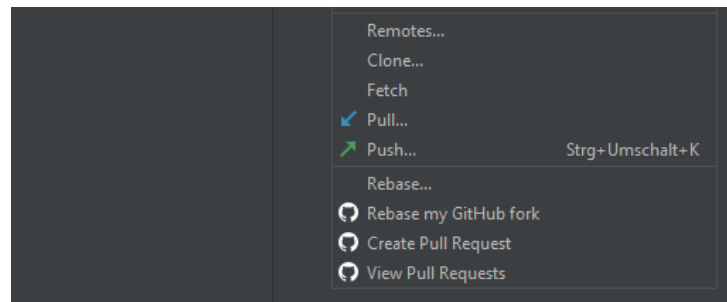

We use the plug-in “[Darkyen's Time Tracker](https://plugins.jetbrains.com/plugin/9286-darkyen-s-time-tracker)” which adds an widget to track time. It also provides a git Integration to add the spent to the commit message.

## Github integration

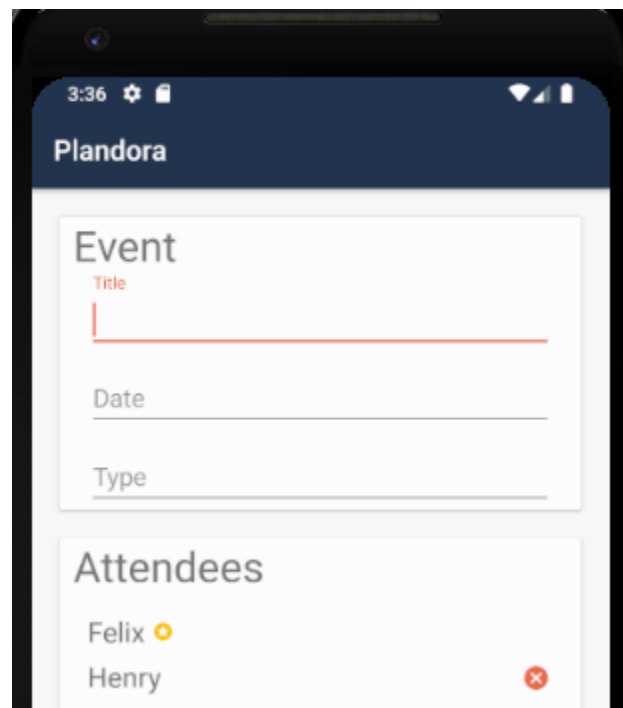

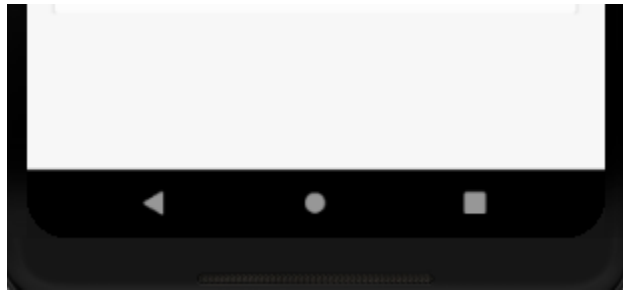

Per default, Android Studio includes a Github Integration to pull/push and to show pull requests.

## Development Progress

In the last week, we also started to create the “Create Event Activity”. Right now, it does not offer the functionality to actually persist an event or to invite other app users. Nevertheless, this screenshot shows how it might look like once it’s finished:
