In the fourth week we started our Use Case Documentation. So far we specified two Use Cases: the creation of new events and viewing event details.

UCS – Create Events < https://github.com/Honrix /PlandoraDocumentation/blob/main /UCS/01_Create%20Event/Create%20Event.md>

Activity Diagram:
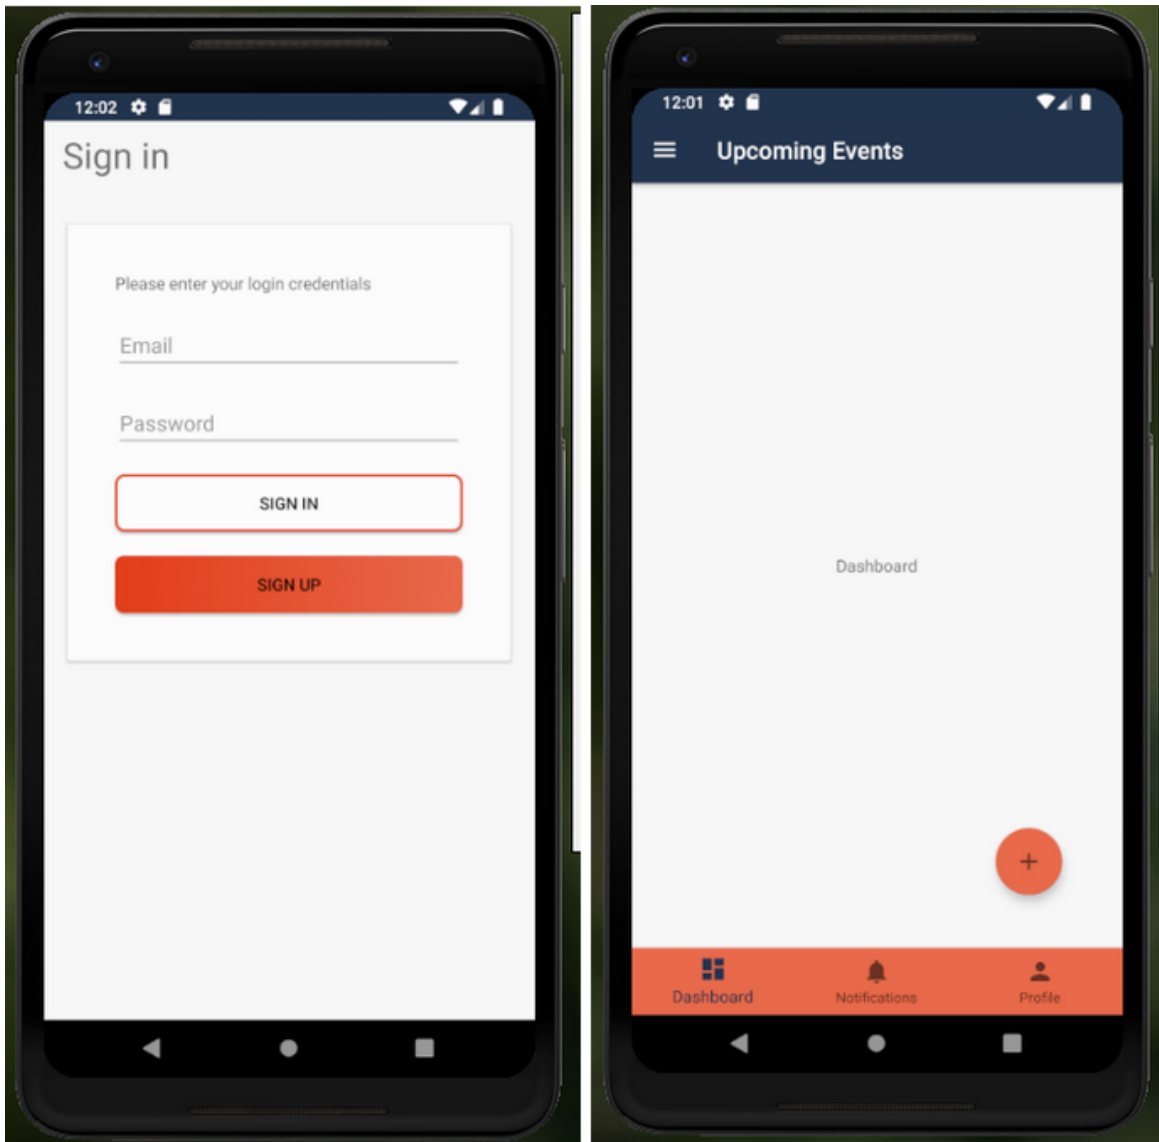

User	System	UI

The whole specification can be found **here < https://github.com /Honrix/PlandoraDocumentation/blob/main /UCS/01_Create%20Event/Create%20Event.md> . < https://raw.githubusercontent.com/Honrix /PlandoraDocumentation/main/UCS/Create%20Event.png>**

UCS – Show Event Details < https://github.com /Honrix/PlandoraDocumentation/blob/main /UCS/04_Show%20Event%20Details /Show%20Event%20Details.md>

Development Progress

In the last two weeks we also set up the Android and Firebase Project. On this occasion we implemented the functionality to sign in to existing (manually created) accounts and created a first app layout

shown below.

We will update our Use Case Specifications over the time.

As before, you are welcome to leave a comment! If you have any questions or suggestions, let us know!
